Quick Start Alerts Install Guide

Installation instructions for MIP Accounting Alerts (Optional)

This guide includes specific instructions on how to install the MIP Accounting Alerts on a web server.

Download MIP Accounting

- To download MIP Fund Accounting, click the link in the email received from your MIP Fund Accounting sales representative to open the MIP download page.
- To install, select the appropriate download link.
- The system automatically runs SETUP.EXE. The MIP Fund Accounting installation menu displays the Setup tab.
- Review the following documents: *Quick Start Install Guide, Installation Guide, and System Requirements* . You can print these documents or review them online.

Before you begin

- The user logged on the server machine must be a member of the Local Administrators group, as well as a user with Administrator rights on the SQL Server or have access to the SQL Server System Admin (SA) password.
- Verify that Microsoft .NET Core Runtime version 8.0.8 or higher is installed.
- Verify that you have MIP Fund Accounting installed and have accessed the system at least once.
- Confirm the location and access to the MIP Fund Accounting database server.

MIP Fund Accounting Alerts Server – Install

Complete the following steps to install MIP Accounting Alerts on a web server.

1. After reviewing the provided documentation, select the Setup Alerts tab.
2. Select the Begin Alerts Installation Process option. The system begins extracting the setup.exe file.

Note: Beginning in 2023.2, Alerts will operate as a Windows Service, not an IIS service. Be sure to install the Microsoft ASP .NET Core Runtime version 8.0.8 or later before running the MIP Accounting Alerts installation wizard. If your web server does not have the latest version, the MIP Fund Accounting Alerts installation wizard cannot continue. You must exit the wizard and restart it after you install the ASP.NET Core Runtime.
